

INTRODUCTION TO LIBRARY SEARCH

UC Library Search is UCLA Library's new discovery tool that launched July 29, 2021. It will provide access to UCLA and UC Libraries material and search for articles, replacing the UCLA Library Catalog, Melvyl Catalog, and ArticlesPlus. Searching the UCLA Library holdings as well as the holdings of all other UC Libraries just got that much easier!

On the left side of the screen, you can filter your search by availability, resource type, and more.

These are your search results. Click on a search result to view the catalog record for that item.

If you need help you can always ask a librarian using the 24/7 librarian widget!
